GoldFrame Agency Suite

READ ME FIRST · V2.0 · 5 TOOLS · ZERO DEPENDENCIES · WORKS OFFLINE

WELCOME

Welcome to GoldFrame Agency Suite. This bundle gives you five professional-grade business tools that run entirely in your web browser. No subscriptions, no accounts, and your client data never leaves your hard drive.

Version 2.0 introduces a license key activation system. Free users get full access to all tools — PDF exports will carry a GoldFrame watermark until you activate your key.

> **Note:** You are currently using the Free Version. PDF exports will contain a GoldFrame watermark. To remove the watermark and unlock the tools for professional use, grab a lifetime license key here:
> https://annsri.gumroad.com/l/goldframekit

WHAT'S INCLUDED

FILE	TOOL	USE IT WHEN...
`proposal-builder.html`	Proposal Builder	Starting a new project — send before the contract
`client-contract.html`	Client Contract	Formalising the agreement — send after proposal is accepted
`project-tracker.html`	Project Roadmap	Sharing a visual plan with your client at kickoff
`invoice-generator.html`	Invoice / Quote Builder	Requesting payment — send at milestones or completion

FILE	TOOL	USE IT WHEN...
`expense-tracker.html`	Expense Tracker	Logging costs throughout the project for tax time

QUICK START & ACTIVATION

01 **Extract the Files:** Unzip the downloaded file to a permanent folder on your computer.

02 **Open the Tool:** Open any `.html` file directly in your browser.

03 **Unlock the Premium Export:** To remove the free watermark, click the 🔑 **Unlock** badge in the bottom right corner of the screen.

04 **Activate:** Paste your Gumroad License Key and click Activate. *(Note: You must be connected to the internet for this exact second so the tool can verify your key.)*

⚠️ IMPORTANT TECHNICAL NOTES

- **Browser Compatibility:** You **must** use Google Chrome, Microsoft Edge, or Brave to generate PDFs. Apple Safari's print engine does not fully support the background graphics required for these templates and is not recommended.
- **Offline Security Activation:** Because these tools run locally on your hard drive, your browser isolates security per file. You will need to paste your license key into *each* of the 5 tools the very first time you use them. Once activated, they remain unlocked forever.

SAVING YOUR WORK

Each tool has a **Save** button that stores your work in your browser's local storage — think of it as a quick draft save. This data persists between sessions as long as you use the same browser on the same device.

> **Important:** Local storage can be cleared if you clear your browser cache or browsing data. Always export a PDF or CSV after completing important work.

Best practice:

- Use **Save** for quick in-progress drafts.
- Use **Print / Save as PDF** to create your permanent, shareable document.
- For the Expense Tracker, use **Export CSV** regularly as your permanent backup.

EXPENSE TRACKER — CSV IMPORT FORMAT

The Expense Tracker can import CSV files, but requires a specific column format. Bank-exported CSVs will **not** import directly — you must rename the columns first.

COLUMN	REQUIRED	EXAMPLE
Date	Yes	2026-03-15
Description	Yes	Adobe Creative Cloud
Category	No	Software
Notes	No	Annual subscription
Tax	No	8.50
Amount	Yes	54.99

To import from your bank: export a CSV, open in Excel or Google Sheets, rename the column headers to match the format above, save as CSV, then use the **Import CSV** button. The easiest approach: use the Expense Tracker's built-in **Export CSV** after each session — this creates a perfectly formatted backup you can always re-import.

CLIENT CONTRACT — IMPORTANT NOTICE

> **Legal Disclaimer:** The Client Contract template is provided for informational and starting-point purposes only. It does not constitute legal advice. Contract law varies significantly by country, state, and jurisdiction. We strongly recommend having a qualified lawyer review any contract before you use it with clients.

The included clauses represent common freelance contract provisions and are written to be a solid starting point. You can toggle clauses on/off and edit all text directly in the browser before exporting.

PDF EXPORT TIPS

All tools use your browser's built-in print-to-PDF function. For the best results:

- In the print dialog, set Destination to **"Save as PDF"**.
- Set Paper size to **A4** or **Letter** depending on your region.
- Set Margins to **"Default"** or **"Minimum"**.
- Enable **"Background graphics"** to ensure coloured status badges, progress bars, and table borders render flawlessly. GoldFrame automatically switches to a clean white layout for PDF — this setting only affects colour elements like badges.

RECOMMENDED WORKFLOW

Use the tools in this order for each new project:

1. **Proposal Builder:** Send to client before any work begins.
2. **Client Contract:** Send once the proposal is accepted.
3. **Project Roadmap:** Share with the client at project kickoff.
